

Remedial Education Policy Review
Task Force
06/22/2012

Introductions and Review from May 25th Meeting

- Tamara quickly went through the highlights from Matt's presentation especially for those individuals who were not at that meeting. Specifically, what is the Task Force's charge.
- Comments and questions about Matt's presentation included:
 - It was a good legislative history
 - The term "college readiness" was challenged as being more than one thing
 - Some agreement and concern that from the K-12 perspective, an entire segment of the population is left out
 - Tamara clarified that there was a similar task force for K-12 to develop graduation guidelines
- The "Best Policy" pictures from the first meeting were discussed

Policy/Data Discussion

- When the data reports are ready, would like to communicate those back to K-12 without them having a sense of a finger being pointed at them as being the source of "the problem"
- Post secondary readiness vs. college readiness vs. workforce readiness
- Terminology remedial/developmental/basic skills are used interchangeably but don't necessarily mean the same thing
- Many policies do not have a student responsibility piece

DHE Research – Beth Bean
